

### Self-laminating labels, laser

#### Helatag 1104 (White-Transparent)

The high quality polyester material makes these labels especially suitable for self-laminating marking of wires and cables. The protective film provides effective protection against abrasion or soiling of the labels.

For cable markers with a total length of more than approx. 100mm, we use a slightly thicker material (type 1105). This allows the marker to be removed from the sheet more easily by hand and the greater rigidity of the material simplifies attachment onto a large cable or pipe.

For problem-free printing, we recommend TagPrint Pro software. This contains all the labels listed, which can be called up immediately. There is no need for time-consuming installation. For simple applications we recommend our MS Windows Word printer templates, from [www.hellermannnyton.co.uk](http://www.hellermannnyton.co.uk) (download zone).

#### Features and Benefits

- High-quality self laminating labels
- Suitable for marking of wires and cables
- Laminating function gives excellent protection against humidity and mechanical abrasion
- Rounded edge design gives additional bonding strength
- Standard material (23 micron) for standard labels
- Simple and efficient label design and printing with Tagprint Pro labelling software
- PDF templates available from [www.hellermannnyton.co.uk](http://www.hellermannnyton.co.uk) for those wishing to use MS Word
- Clear protective box to ensures labels stay as good as new

Laminating the mark gives long-term print survivability.

<b>MATERIAL</b>	Type 1104, Polyester (PET), white-transparent (WH/CL), self-laminating
<b>Operating Temperature</b>	-40 °C to +150 °C
<b>Curing Temperature</b>	from +10 °C
<b>Adhesive</b>	Acrylic
<b>Thickness of Foil (µm)</b>	25 µm
<b>Chem. Material Properties</b>	Excellent resistance to alcohol, gasoline, cleaning solvents, butanol, ethyl and Butylcellosolve solvent, battery acid.
